

INSTALL WITH CONFIDENCE

America's Most Trusted Polymeric Jointing Products

NEW

THE TRUE ALTERNATIVE TO MORTAR, STONE DUST AND POLYMERIC STONE DUST

Techniseal Polymeric sands contribute to LEED credits, based on the use of regional and recycled materials.

NOCO™ Zen at Work

Easy, fast and clean, NOCO is the first true alternative to mortar and stone dust.

NO COMPACTION

THE FIRST POLYMERIC JOINTING PRODUCT SPECIFICALLY DEVELOPED FOR FLAGSTONES

- For residential, commercial, industrial and public projects where mechanical compaction is either not possible or traditionally not used
- Stays flexible and responds to ground movements that could cause the joints to crack and break apart or damage the stones
- Strongly adheres to the inner walls of pavers and stones without ever contracting
- Techniseal's binding technology results in impervious joints with great resistance to weed growth, insect invasion and erosion
- Ideal for flagstone, concrete and wet-cast pavers, such as imitation CobbleStone, highly textured surfaces, large slabs and porcelain tiles (when joints are 6mm (1/4") or larger)
- For false joints
- Ideal for wide joints from 6mm to 5cm (1/4"-2") with interstices up to 10cm (4")
- The true alternative to mortar, stone dust and polymeric stone dust.

Desert Tan
(40104121)

Iron Grey
(40104120)

1 Spread and fill the gaps

2 Level with blower

3 Activate by watering
